DETAILED ACTION

Claims 1-7 are presented for reconsideration on the merits.

The amendment of June 29, 2004, has been received and entered. The IDS filed in the case has been considered as indicated on the enclosed PTO-1449 Form(s). Applicant's arguments filed June 29, 2004, have been fully considered but they are not persuasive. The newly supplied art reference supplied after the first office action appears to read on the steps for dehydrating a tissue as claimed herein and thus, is a newly supplied reference submitted by Applicants. Therefore, based upon Applicants' arguments and newly supplied reference after first office action a new grounds of rejection have been necessitated as follows:

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 112

Claims 1-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1-7 lack antecedent basis for the recitation of "the range" in claim 1, line 3. It is suggested to change "the" before range" to --a-- .

Claim Rejections - 35 USC § 102

Claims 1-5 and 7 are rejected under 35 U.S.C. 102(b) as anticipated by newly cited Morita et al., cited on enclosed PTO-1449 Form.

Claims are drawn to a method for dehydrating biological tissues.

Morita et al teach a method for dehydrating tissue comprising dehydrating using ethanol and freezing. Note column 2, lines 5-12 and lines 40-69, column 3, lines 1-2, lines 10-51, column 4, lines 25-30.

The claims appear to be identical to the cited disclosure and are thus, considered to be anticipated by the teachings of the reference.

Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over newly cited Morita et al (cited on enclosed PTO-1449 copy) as cited above in view of Druecke et al. (US Pat No. 6187137).

Claim 6 is drawn to a treatment with ultrasound, a vibrator or a shaker.

Druecke et al teach a variety of useful techniques for dehydrating, such as treatment with sonic roll, shaker roll, or vibrator roll, note col. 3, lines 38-51.

The claim differs from Morita et al in that the treatment step using these mechanical means is not disclosed.

It would have been obvious to one of ordinary skill in the art at the time the claimed invention was made to select for a mechanical means for dehydrating as disclosed by Morita et al. one of the useful techniques for dehydrating, such as treatment with sonic roll, shaker roll, or vibrator roll as disclosed by Druecke. Clearly one of skill would have known of these dehydration means and to select for one of these is well within the purview of a person of ordinary skill in the art. The claim is prima facie obvious.

All claims fail to be patentably distinguishable over the state of the art discussed above and cited on the enclosed PTO-892 and/or PTO-1449. Therefore, the claims are properly rejected.

No claims are allowed.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
